No. **2007-10**

YEAR	MODEL	SERIAL NUMBER
2007	All	All

Back probe test wires are now available as service tools (P/N 529 036 063).

The package contains 2 test wires with 2 different tip sizes.

- [1] Bigger Probe
- [2] Smaller Probe

One extremity of the test wires has a small flat and slightly rounded shape to back probe various connectors. The other extremity fits our multi-meter test probe. These test wires are very useful to conduct resistance and voltage tests on connectors without damaging or disconnecting them.
